Plant Peonies in good soil, in full sun if possible, and away from trees, buildings, etc. Do not plant where a peony has been before, unless all old soil is taken out and replaced with fresh. Plant 3 to 4 feet apart; set so that the eyes point upward and are 2 to 3 inches below the top of ground (very important). Give each root 2 quarts of water when planted, and then make a 6 inch mound of dirt above ground level to prevent heaving, scrape mound away late next spring.

Important. Open your package of roots immediately when they arrive. Plant as soon as possible but if you have to wait a few days, either keep moist in open box in cool cellar, or better yet, bury in garden.
